## **There is something at work in my soul which I do not understand...**

Mary Shelley: literary queen of the Romantic era, deeply influenced by the Gothic tradition, and arguably the matriarch of the Science Fiction genre. Her works, though composed in the 1800s, contain elements straight out of today's headlines: the tension between what science can do vs. what it should do, cryonics, contagion, apocalypse and other dark futuristic themes. Shelley introduced the world to the first "mad scientist" character in her most popular work, Frankenstein, inspiring generations of horror stories, films, and comic books.
