**Who's in Charge?: Free Will and the Science of the Brain** Michael S. Gazzaniga

“Big questions are Gazzaniga’s stock in trade.”

—*New York Times*

“Gazzaniga is one of the most brilliant experimental neuroscientists in the world.”

—Tom Wolfe

“Gazzaniga stands as a giant among neuroscientists, for both the quality of his research and his ability to communicate it to a general public with infectious enthusiasm.”

—Robert Bazell, Chief Science Correspondent, NBC News

The author of *Human*, Michael S. Gazzaniga has been called the “father of cognitive neuroscience.” In his remarkable book, *Who’s in Charge?*, he makes a powerful and provocative argument that counters the common wisdom that our lives are wholly determined by physical processes we cannot control. His well-reasoned case against the idea that we live in a “determined” world is fascinating and liberating, solidifying his place among the likes of Oliver Sacks, Antonio Damasio, V.S. Ramachandran, and other bestselling science authors exploring the mysteries of the human brain.
