Mapping the Mind

Rita Carter

Mapping the Mind Rita Carter

Today a brain scan reveals our thoughts and moods as clearly as an X-ray reveals our bones. We can actually observe a person's brain registering a joke or experiencing a painful memory. In *Mapping the Mind*, award-winning journalist Rita Carter draws on the latest imaging technology and science to chart how human behavior and personality reflect the biological mechanisms behind thought and emotion. This acclaimed book, a complete visual guide to the coconut-sized, wrinkled gray mass we carry around inside our heads, has now been completely revised and updated throughout. Among many other topics, Carter explores obsessions and addictions, the differences between men's and women's brains, and memory.

- Comprehensively updated for this edition with the latest research, case studies, and contributions from distinguished scientists
- Addresses recent controversies over behavior prediction and prevention
- Includes new information on mirror neurons, unconscious cognition, and abnormalities in attention spans

From reader reviews:

Paul Holt:

Now a day individuals who Living in the era everywhere everything reachable by interact with the internet and the resources in it can be true or not involve people to be aware of each data they get. How people have to be smart in receiving any information nowadays? Of course the reply is reading a book. Reading through a book can help folks out of this uncertainty Information specially this Mapping the Mind book since this book offers you rich facts and knowledge. Of course the data in this book hundred per cent guarantees there is no doubt in it as you know.

Jennifer Bedard:

Spent a free time for you to be fun activity to perform! A lot of people spent their free time with their family, or all their friends. Usually they performing activity like watching television, going to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Might be reading a book could be option to fill your free of charge time/ holiday. The first thing that you ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the publication untitled Mapping the Mind can be very good book to read. May be it might be best activity to you.

Adam Tonn:

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book ended up being rare? Why so many problem for the book? But virtually any people feel that they enjoy intended for reading. Some people likes looking at, not only science book but novel and Mapping the Mind or maybe others sources were given know-how for you. After you know how the truly amazing a book, you feel would like to read more and more. Science e-book was created for teacher or even students especially. Those publications are helping them to increase their knowledge. In some other case, beside science guide, any other book likes Mapping the Mind to make your spare time more colorful. Many types of book like this.

Thomas Crittenden:

A lot of people said that they feel weary when they reading a book. They are directly felt this when they get a half parts of the book. You can choose the book Mapping the Mind to make your personal reading is interesting. Your current skill of reading proficiency is developing when you including reading. Try to choose basic book to make you enjoy you just read it and mingle the sensation about book and looking at especially. It is to be first opinion for you to like to available a book and go through it. Beside that the reserve Mapping the Mind can to be your friend when you're experience alone and confuse using what must you're doing of this time.
