Seeking Mandela: Peacemaking Between Israelis And Palestinians (Politics History & Social Chan)

Heribert Adam

The ongoing violence, despair and paralysis in Israel/Palestine resembles a similar gloomy mood in South Africa during the late 1980s. Analogies with the South African case are increasingly applied to Israel/Palestine for two different purposes: to showcase South Africa as an inspiring model for a negotiated settlement and to label Israel a "colonial settler state" that should be confronted with similar strategies (sanctions, boycott) as applied against the apartheid regime. Both assumptions are problematic, because of the different historical and socio-political contexts. Peacemaking resulted in an inclusive democracy in South Africa, while territorial separation in two states is widely hailed as the solution in Israel/Palestine. However, a viable Palestinian state is undermined by Jewish settler expansionism and separation barriers on occupied land. Unresolved issues in comparative politics and practical questions for conflict resolution can be clarified from the real-life laboratories of Israel and South Africa.
