Conformal Field Theories and Tensor Categories: Proceedings of a Workshop Held at Beijing International Center for Mathematical Research (Mathematical Lectures from Peking University)

Conformal Field Theories and Tensor Categories: Proceedings of a Workshop Held at Beijing International Center for Mathematical Research (Mathematical Lectures from Peking University)

The present volume is a collection of seven papers that are either based on the talks presented at the workshop "Conformal field theories and tensor categories" held June 13 to June 17, 2011 at the

Beijing International Center for Mathematical Research, Peking University, or are extensions of the material presented in the talks at the workshop. These papers present new developments beyond rational conformal field theories and modular tensor categories and new applications in mathematics and physics. The topics covered include tensor categories from representation categories of Hopf algebras, applications of conformal field theories and tensor categories to topological phases and gapped systems, logarithmic conformal field theories and the corresponding non-semisimple tensor categories, and new developments in the representation theory of vertex operator algebras. Some of the papers contain detailed introductory material that is helpful for graduate students and researchers looking for an introduction to these research directions. The papers also discuss exciting recent developments in the area of conformal field theories, tensor categories and their applications and will be extremely useful for researchers working in these areas.

From reader reviews:

Gregory Mendoza:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite publication and reading a book. Beside you can solve your long lasting problem; you can add your knowledge by the reserve entitled Conformal Field Theories and Tensor Categories: Proceedings of a Workshop Held at Beijing International Center for Mathematical Research (Mathematical Lectures from Peking University). Try to make the book Conformal Field Theories and Tensor Categories: Proceedings of a Workshop Held at Beijing International Center for Mathematical Research (Mathematical Lectures from Peking University) as your friend. It means that it can for being your friend when you sense alone and beside that course make you smarter than before. Yeah, it is very fortunated in your case. The book makes you considerably more confidence because you can know anything by the book. So , let me make new experience as well as knowledge with this book.

Domingo Adams:

The experience that you get from Conformal Field Theories and Tensor Categories: Proceedings of a Workshop Held at Beijing International Center for Mathematical Research (Mathematical Lectures from Peking University) is a more deep you excavating the information that hide within the words the more you get considering reading it. It doesn't mean that this book is hard to understand but Conformal Field Theories and Tensor Categories: Proceedings of a Workshop Held at Beijing International Center for Mathematical Research (Mathematical Lectures from Peking University) giving you enjoyment feeling of reading. The article author conveys their point in specific way that can be understood simply by anyone who read this because the author of this book is well-known enough. This book also makes your own personal vocabulary increase well. Making it easy to understand then can go along with you, both in printed or e-book style are available. We suggest you for having this particular Conformal Field Theories and Tensor Categories: Proceedings of a Workshop Held at Beijing International Center for Mathematical Research (Mathematical Lectures from Peking University) instantly.

Joseph Cosgrove:

Reading a book being new life style in this 12 months; every people loves to go through a book. When you study a book you can get a great deal of benefit. When you read books, you can improve your knowledge, since book has a lot of information into it. The information that you will get depend on what types of book that you have read. If you want to get information about your examine, you can read education books, but if you act like you want to entertain yourself read a fiction books, these kinds of us novel, comics, as well as soon. The Conformal Field Theories and Tensor Categories: Proceedings of a Workshop Held at Beijing International Center for Mathematical Research (Mathematical Lectures from Peking University) will give you new experience in looking at a book.

Kevin Zavala:

You are able to spend your free time to see this book this publication. This Conformal Field Theories and Tensor Categories: Proceedings of a Workshop Held at Beijing International Center for Mathematical Research (Mathematical Lectures from Peking University) is simple to deliver you can read it in the playground, in the beach, train in addition to soon. If you did not have got much space to bring the particular printed book, you can buy the actual e-book. It is make you simpler to read it. You can save typically the book in your smart phone. So there are a lot of benefits that you will get when one buys this book.
