Handbook of Potato Production, Improvement, and Postharvest Management (Crop Science) Jai Gopal, S.M. Khurana

The basics through practical application—all in one book!

Potatoes are a crucial food crop around the world, grown in nearly 150 countries. The Handbook of Potato Production, Improvement, and Postharvest Management compiles everything you need to know about potato crop production in one well-organized reference. Leading international authorities clearly discuss the biology, genetics, breeding, diseases, and effective approaches for improvement of crop and handling after harvest. This one-of-a-kind text explores, from interdisciplinary perspectives, every aspect of potato crop management from seed germination to end use while presenting the most current research available.

The Handbook of Potato Production, Improvement, and Postharvest Management reviews both wild and cultivated potatoes, examining the crop's origins, history, and habitat. Cultivation techniques are discussed in detail, with emphasis on breeding, biotechnological, and agronomic methods that can improve yield and help ensure the health of the vegetable. Qualitative and quantitative genetic traits are comprehensively explained, and integrated management of pests, diseases, weed, and water are extensively considered. Various abiotic stresses are examined, including heat, drought, salinity, frost, and others. Potato crop's most devastating disease, late blight, is explored in detail. Different types of after-harvest storage are analyzed with an eye toward maintaining optimum freshness year-round, and a useful description of biochemical changes effected during storage is included. Processing and detailed information on food value are also reviewed. In addition, a final chapter explores true potato seed (TPS) options. The book includes detailed references and helpful tables, graphs, and figures to enhance understanding of material.

Topics in the Handbook of Potato Production, Improvement, and Postharvest Management include:

- history
- structure
- biosystematics
- genetics
- breeding
- biotechnology for improvement
- approaches to improve quality
- ecophysiology and agronomic management
- comprehensive information on diseases and viruses
- insects
- abiotic stresses and their management
- storage issues
- processing
- *and much more!*

The Handbook of Potato Production, Improvement, and Postharvest Management makes an invaluable desktop reference for educators, postgraduate students, researchers, and any potato industry professional.

The text is also perfect for university reference libraries.

From reader reviews:

Darren Meekins:

This Handbook of Potato Production, Improvement, and Postharvest Management (Crop Science) book is not really ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is definitely information inside this e-book incredible fresh, you will get info which is getting deeper you actually read a lot of information you will get. This specific Handbook of Potato Production, Improvement, and Postharvest Management (Crop Science) without we know teach the one who looking at it become critical in considering and analyzing. Don't end up being worry Handbook of Potato Production, Improvement, and Postharvest Management (Crop Science) can bring when you are and not make your case space or bookshelves' turn into full because you can have it inside your lovely laptop even mobile phone. This Handbook of Potato Production, Improvement, and Postharvest Management (Crop Science) having very good arrangement in word along with layout, so you will not truly feel uninterested in reading.

Agnes Henson:

Are you kind of hectic person, only have 10 or even 15 minute in your time to upgrading your mind ability or thinking skill even analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your short time to read it because pretty much everything time you only find book that need more time to be go through. Handbook of Potato Production, Improvement, and Postharvest Management (Crop Science) can be your answer mainly because it can be read by you actually who have those short extra time problems.

Robert Hightower:

That e-book can make you to feel relax. This specific book Handbook of Potato Production, Improvement, and Postharvest Management (Crop Science) was bright colored and of course has pictures around. As we know that book Handbook of Potato Production, Improvement, and Postharvest Management (Crop Science) has many kinds or variety. Start from kids until adolescents. For example Naruto or Private eye Conan you can read and believe that you are the character on there. So , not at all of book are generally make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book in your case and try to like reading in which.

Christopher Arnold:

As a university student exactly feel bored for you to reading. If their teacher inquired them to go to the library or even make summary for some reserve, they are complained. Just minor students that has reading's internal or real their pastime. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that reading through is not important, boring and can't see colorful photos on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we would like. Likewise word says, ways to reach

Chinese's country. Therefore , this Handbook of Potato Production, Improvement, and Postharvest Management (Crop Science) can make you truly feel more interested to read.
