A History of the Woodburytype

Barret Oliver

A History of the Woodburytype Barret Oliver

In 1864 Walter Bentley Woodbury introduced a process for mechanically reproducing photographs that changed forever the way the world looked at images. Aesthetically beautiful, permanent and infinitely reproducible, the Woodburytype was the first process used extensively to photographically illustrate books, journals, museum catalogs, magazines and even campaign materials. More than a century after its heyday the Woodburytype stands as a pinnacle of photographic achievement. This book traces the history of Woodbury's process from the early technology and experiments to its commercial success and domination of the illustration field, and further to attempts to adapt it to industrialized methods, and finally, to its eventual disuse. Also covered is the story of how Woodbury overcame daunting personal odds to bestow this beautiful photographic process upon the world.
