Complex Valued Nonlinear Adaptive Filters: Noncircularity, Widely Linear and Neural Models

Danilo P. Mandic, Vanessa Su Lee Goh

Complex Valued Nonlinear Adaptive Filters: Noncircularity, Widely Linear and Neural Models Danilo P. Mandic, Vanessa Su Lee Goh

This book was written in response to the growing demand for a text that provides a unified treatment of linear and nonlinear complex valued adaptive filters, and methods for the processing of general complex signals (circular and noncircular). It brings together adaptive filtering algorithms for feedforward (transversal) and feedback architectures and the recent developments in the statistics of complex variable, under the powerful frameworks of CR (Wirtinger) calculus and augmented complex statistics. This offers a number of theoretical performance gains, which is illustrated on both stochastic gradient algorithms, such as the augmented complex least mean square (ACLMS), and those based on Kalman filters. This work is supported by a number of simulations using synthetic and real world data, including the noncircular and intermittent radar and wind signals.

From reader reviews:

Deborah Hart:

Spent a free the perfect time to be fun activity to complete! A lot of people spent their spare time with their family, or their very own friends. Usually they undertaking activity like watching television, gonna beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Could be reading a book may be option to fill your totally free time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to attempt look for book, may be the publication untitled Complex Valued Nonlinear Adaptive Filters: Noncircularity, Widely Linear and Neural Models can be good book to read. May be it may be best activity to you.

Buddy Stewart:

Often the book Complex Valued Nonlinear Adaptive Filters: Noncircularity, Widely Linear and Neural Models has a lot info on it. So when you make sure to read this book you can get a lot of profit. The book was written by the very famous author. The author makes some research before write this book. This kind of book very easy to read you will get the point easily after reading this book.

Joyce Francois:

Why? Because this Complex Valued Nonlinear Adaptive Filters: Noncircularity, Widely Linear and Neural Models is an unordinary book that the inside of the guide waiting for you to snap it but latter it will distress you with the secret the item inside. Reading this book alongside it was fantastic author who also write the book in such remarkable way makes the content inside easier to understand, entertaining approach but still convey the meaning entirely. So , it is good for you because of not hesitating having this any longer or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other book include such as help improving your talent and your critical thinking method. So , still want to postpone having that book? If I have been you I will go to the book store hurriedly.

Karen Morris:

The book untitled Complex Valued Nonlinear Adaptive Filters: Noncircularity, Widely Linear and Neural Models contain a lot of information on this. The writer explains your ex idea with easy way. The language is very simple to implement all the people, so do not worry, you can easy to read the item. The book was authored by famous author. The author will take you in the new period of time of literary works. You can actually read this book because you can please read on your smart phone, or program, so you can read the book with anywhere and anytime. If you want to buy the e-book, you can start their official web-site and also order it. Have a nice learn.
