Textbook of Assisted Reproductive Techniques, Fourth Edition (Two Volume Set): Textbook of Assisted Reproductive Techniques Fourth Edition: Volume 1: Laboratory Perspectives

Textbook of Assisted Reproductive Techniques, Fourth Edition (Two Volume Set): Textbook of Assisted Reproductive Techniques Fourth Edition: Volume 1: Laboratory Perspectives

Textbook of Assisted Reproductive Techniques has become a classic comprehensive reference for the whole team at the IVF clinic. The fourth edition comes more conveniently as a set of two separate volumes, one for laboratory aspects and the other for clinical applications.

The text has been extensively revised, with the addition of several important new contributions on laboratory aspects including developing techniques such as PICSU, IMSI, and time-lapse imaging. The second volume focuses on clinical applications and includes new chapters on lifestyle factors, tailored ovarian stimulation, frozen-thawed embryo transfer, viral disease, and religious perspectives. As before, methods, protocols, and techniques of choice are presented by eminent international experts.

The two volume set includes:

- Volume One - Laboratory Perspectives
- Volume Two - Clinical Perspectives
